

40 seconds can improve your life

In 40 seconds scan, the Fit3D's groundbreaking technology provides hundreds of measurements including:

Body Shape Wellness Score:

Fit3D measures your overall body mass utilizing body shape indexes from leading universities helping to identify your unique optimal body shape. Each scan measures circumferences, lengths, contours, widths, surface areas, and volumes.

Posture Analysis:

Fit3D evaluates the state of your posture from head to toe in order to create a training program to improve muscular balance and alignment, build strength in weakened areas, and assist in identifying areas of rehabilitation from prior injury and promote even body development.

Body Composition:

Fit3D technology utilizes the proprietary DXA correlated body fat percentage algorithm to provide an exact breakdown of bone mass, fat tissue and muscle mass in addition to identifying the amount of fat mass and lean mass.

Body Weight 4-point Scale:

Fit3D analyzes your total body weight and balance of weight.

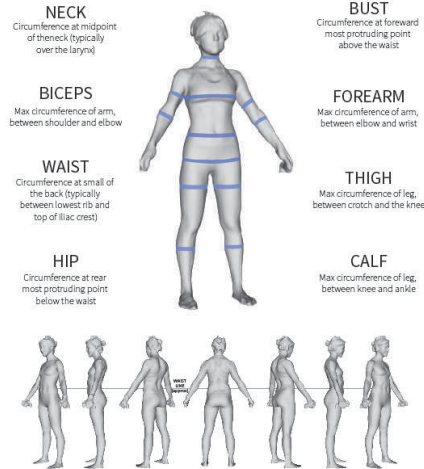

Track Your Progress:

Fit3D data is securely cloud stored for future reference and to track progress with detailed side by side comparison keeping you on track and on goal.

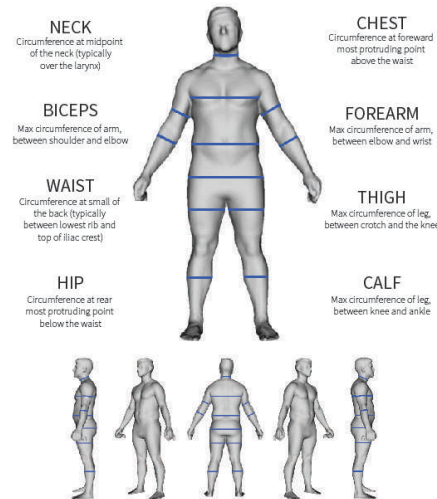

Custom Fit Marketplace:

Put your best fit forward no matter your shape and size. Whether you're an elite athlete or undergoing a transformation....your body deserves the best fitting apparel. Fit3D has aligned with the BeSpoke marketplace to offer custom fit apparel for weekend and work. Step out with style and comfort.
